

Tool 3:

Debt-reduction worksheet

When it comes to reducing your debt, there are two basic strategies:

Highest interest rate method

Focus on the unsecured debt with the highest rate of interest, and eliminate it as quickly as possible, because it is costing you the most. Once it is paid off, focus on the next most expensive debt.

PRO	CON
You eliminate the most costly debt first.	You may not feel like you are making progress very quickly, especially if this debt is large.

Snowball method

Focus on the smallest debt. Get rid of it as soon as possible. Once you have paid it off in full, continue with the payment, but now dedicate it to the next smallest debt. This is called the “snow ball method.” You create “a snow ball of debt payments” that keeps getting bigger as you eliminate each debt. How? You keep making the payments, but you are redirecting them to the next debt as each debt is paid off.

PRO	CON
You may see progress quickly, especially if you have many small debts. For some people, this creates momentum and motivation.	You may pay more in total because you are not necessarily eliminating your most costly debt.

There are other things you can do, too.

- Call your creditors to see if they will lower your interest rates. If you have paid all of your bills on time, they may lower it to maintain your loyalty. If you are in a difficult position, you could explain your hardship and ask them to lower the rate.
- Get another job in the short-term. Use all of your additional earnings to eliminate debts.
- Sell something, and use the income to pay off a debt or debts.
- If you are eligible, file for tax credits, and use your refund to pay down or eliminate debts.

Check the method you are going to use, and then follow the instructions.

- **Highest interest rate method**

1. List your debts from highest rate to lowest rate.
2. In the column labeled Extra Payment, list the extra payment you will dedicate to the debt with the highest interest rate until you have it paid off.
3. When this debt is paid off, allocate the entire payment (monthly payment + extra payment) you were making to the next debt on the list.

- **Snowball method**

1. List your debts from smallest to largest in terms of the amount outstanding.
2. In the column labeled *Extra payment*, list the extra payment you will dedicate to the smallest debt until you have it paid off.
3. When this debt is paid off, allocate the entire payment (monthly payment + extra payment) you were making to the next debt on the list.

Lender	Total amount borrowed	Amount outstanding	Monthly payment	Extra payment	Monthly Due date	Date paid off in full

This Tool is included in the Consumer Financial Protection Bureau's toolkit. The CFPB has prepared this material as a resource for the public.
